

LECO CORPORATION

3000 Lakeview Avenue St. Joseph, MI 49085-2396 U.S.A.
Phone: (616) 983-5531 • Telex: 211605 • Facsimile: (616) 983-3850

SUBJECT: Obsolete LECO Equipment

The following list of LECO Instruments will be obsoleted January 1, 1990. LECO Corporation will continue to service these instruments through January 1, 1990, provided parts are available. LECO will discontinue all field service and in-house repair of these units and their associated sub-components effective January 1, 1990.

CS-44	UO-15
IR-32	TC-30
IR-32H	DC-12
IR-33	DB-64
IR-12	NP-28
TN-14	PM-25
TN-15	XR-22
RO-16	XR-23
RO-17	XR-24
RO-18	586-100 Hot Extraction
UO-14	

Support of these units after January 1, 1990 will be limited to telephone help only by our LECO St. Joseph, Michigan telephone service staff.

This decision is necessitated by the growing number of parts no longer available to LECO by its suppliers. Replacement parts have also been entirely depleted.

All listed instrumentation have been out of active production for a minimum of 10 years.

Lecc Corporation presently manufactures state-of-the-art analytical instrumentation available for replacement of any of the obsoleted systems.

Very truly yours,

Craig Peacock
National Service Manager
