

# LECO CORPORATION

3000 Lakeview Avenue • St. Joseph, MI 49085-2396 U.S.A.  
Phone: (616) 983-5531 • Telex: 211605 • Facsimile: (616) 983-3850

SUBJECT: OBSOLETE LECO EQUIPMENT

The obsolete process on the following list of LECO instruments will begin January 1, 1996. LECO will continue to service these instruments through January 1, 1997, provided that parts are available. LECO will discontinue all field service and in-house repair of these units and their associated sub-components effective January 2, 1997.

## ANALYTICAL

CS-044 Carbon Sulfur Determinator  
RA-100 Aluminum Determinator  
517-800 Acid Titrator  
572-100 Volumetric Carbon  
WR-12 & ELC-12 Carbon Determinator  
521, 523, 537, 540, 550  
621, 623, 763, 768  
Series of Furnaces

Support of these units after January 1, 1997 will be limited to telephone help only by our LECO St. Joseph, Michigan telephone service staff.

This decision is necessitated by the growing number of parts no longer available to LECO by its suppliers, and the shortage of stock item parts.

All listed instrumentation have been out of production for several years.

LECO Corporation presently manufactures state-of-the-art analytical instrumentation available for replacement of any of the obsoleted systems.

Very truly yours,

Craig Peacock  
National Service Director
